GAIN Report Number: PE4012

Peru

Food and Agricultural Import Regulations and Standards

Country Report

2004

Approved by:

Melinda D. Sallyards

U.S. Embassy

Prepared by:

Violeta Gutierrez

Report Highlights:

Sections updated: Food Laws, Labeling Requirements, Food Additive Regulations, Other Regulations and Requirements, Import Procedures, Government Agencies and Other Import Contacts. The FAIRS report is based on Peruvian regulations for importing food products. This report intends to help U.S. exporters meeting local import requirements and consequently, facilitate trade between the U.S. and Peru.

Includes PSD Changes: No
Includes Trade Matrix: No
Annual Report

PERU: FOOD AND AGRICULTURAL IMPORT REGULATIONS AND STANDARDS (FAIRS)

DISCLAIMER: This report has been prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Lima, Peru for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

FINAL IMPORT APPROVAL OF ANY PRODUCT IS ALWAYS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

SECTION I. FOOD LAWS**The General Health Law (*Law No. 26842 of July 20, 1997*)**

Contains the framework for food regulations on sanitary supervision and control of food and beverage in Peru. This type of regulation is related to various laws, supreme decrees and supreme resolutions, and must be published in the official newspaper "El Peruano" before being implemented.

The Ministry of Health, through the General Environmental Health Bureau (DIGESA), is responsible for implementing most regulations regarding processed food products.

The present regulations establish that:

- ☐ Production and trade of food and beverages for human consumption are subject to supervision based on food sanitary standards.
- ☐ It is prohibited to import, manufacture, trade, distribute or store food and beverages that have been adulterated, contaminated, altered or declared unfit for human consumption.
- ☐ Food and beverages manufactured locally or in a foreign country can only be traded with the corresponding certificate of sanitary registration.
- ☐ It is prohibited to import food and beverages from countries where distribution or consumption of the same product is not allowed due to health risk.
- ☐ Personnel involved in production, handling, transportation, conservation, storage, outlay and supply of food and beverages must comply with sanitary standards to avoid contamination.
- ☐ Facilities manufacturing, processing and supplying food and beverages must control the sanitary quality and food safety in accordance with the requirements of the Ministry of Health nationwide.

Regulations of Sanitary Inspection and Control for Food and Beverages (*Decree Supreme No. 007-98-SA of September 25, 1998*)

According to the provisions of the General Health Law and the General Principles of Food Safety included in the Codex Alimentarius, the present regulation establishes the general

hygiene standards, health conditions and requirements for the production, transportation, manufacturing, storage, marketing, preparation and sale of food and beverages for human consumption in Peru, including:

- ❑ The conditions, requirements and procedures for the registration, modification and cancellation of food and beverage sanitary registration.
- ❑ The regulations concerning inspection of the activities and services related to the production and distribution of food products.
- ❑ The applicable measures and sanctions for food safety.
- ❑ The organoleptic characteristics, chemical composition and microbiological conditions that apply to food and beverages.
- ❑ The food quality and safety standards to which food and beverage manufacturers are subject, based on the Hazard Analysis and Critical Control Points (HACCP) system.

Sanitary Supervision Agencies (*Title II, Decree Supreme No. 007-98-SA*)

Ministry of Health–DIGESA: Responsible for sanitary supervision of food and beverage manufacturing, distributing and marketing.

Ministry of Agriculture-SENASA: Responsible for sanitary supervision of fresh fruits and vegetables and animal products such as dairy and meats for human consumption.

Vice-Ministry of Fisheries: Responsible for sanitary supervision for capture, transportation and processing of seafood products, as well as sanitary conditions at shipment ports.

Municipalities: Responsible for sanitary supervision of the establishments trading and manufacturing food and beverages. They work closely with DIGESA.

Sanitary Registration of Processed Food and Beverages (*Title VIII, Decree Supreme No. 007-98-SA*)

DIGESA is in charge of registering, re-registering, modifying, suspending and canceling the sanitary registration of food and beverages nationwide and also:

- ❑ Makes mandatory the sanitary registration for processed food and beverages sold in Peru.
- ❑ Defines industrial food and beverages as those end-products for human consumption that result from physical, chemical or biological processing of animal, plant or mineral inputs and which contain food additives.
- ❑ Establishes which food and beverages are not subject to health registration, including:
 - a) those in natural conditions, packed or not, such as grains, fruits, vegetables, meats, and eggs; b) free samples; and c) products donated by foreign charitable entities.
- ❑ Establishes that a product's sanitary registration permits its manufacture, import or sale by the registration holder who will be responsible for the sanitary quality and safety of the food or beverage being sold.
- ❑ Establishes product groups for sanitary registration purposes using a qualitatively similar mix of basic ingredients and food additives that identify the group as such.

The Ministry of Agriculture (Law Decree No. 25902 of November 29, 1992)

Is responsible for promoting and developing the agricultural sector. It is divided in three major organizations:

The National Agricultural Sanitary and Phytosanitary Service (SENASA): responsible for developing and promoting the participation of the private sector in the implementation, prevention, control and eradication of plant pests and animal diseases.

The Agricultural Research and Extension Service (INIEA): responsible for researching, promotion and technology transference in the jungle (east), Andes (highlands) and coastal areas.

The Natural Resources Service (INRENA): promotes the rational use and conservation of natural resources in conjunction with the private sector.

The National Agricultural Sanitary and Phytosanitary Service (SENASA)

Is responsible for enforcing regulations governing domestic and imported plants and animals and their respective products and by-products, and for preventing foreign and exotic animal and plant diseases. It is composed of two major offices:

Plant Health Office: responsible for protecting the health of plants and preventing the introduction and spread of foreign pests within Peru. It is similar to APHIS's Plant Protection and Quarantine in the United States. All U.S. unprocessed products of plant origin like bulk grains, fresh fruits and vegetables, nuts or seeds, can only be exported to Peru if accompanied by an APHIS phytosanitary certificate, complying with SENASA's import permit requirements. To clear customs, these products are subject to inspection by SENASA.

Animal Health Office: responsible for enforcing regulations governing the import and the export of live animals, semen, embryos and by-products of animal origin, as well as the registration of veterinary products. In cooperation with State governments, SENASA enforces federal laws and regulations to protect and improve animal health, control and eradicate animal diseases such as Food-and-Mouth Disease. It defends borders against foreign and exotic animal diseases. SENASA's regulatory responsibilities for live animals and animal genetics are similar to those ascribed in the United States to APHIS's veterinary services.

Port and Airport Callao Inspection Stations: Functionally depend on the Animal and Plant Health Offices. These stations enforce regulations according to the agricultural health for trading domestic and imported agricultural products.

The Ministry of Health (Law Decree No. 584 of April 18, 1990)

The Ministry of Health rules, guides and promotes the National Health System to achieve a healthier environment. It is composed of two major organizations:

General Environmental Health Bureau (DIGESA): supervises, creates regulations and controls other dependences of the Ministry of Health and Municipalities within its three offices: basic services for health (water and drainage quality), ecology and environmental protection and food safety and zoonosis control. The last is the Peruvian counterpart to the Food and Drug Administration (FDA) regarding food sanitary quality and safety supervision and the registration of processed food and beverages.

General Direction of Pharmaceutical Products and Drugs (DIGEMID): is responsible for registering, modifying, discontinuing and canceling the sanitary registration of dietetic products and sweeteners.

Peru's Customs - ADUANAS (Law No. 24829 of June 8, 1998)

ADUANAS controls the international traffic of merchandises, collects tariffs and prevents and sanctions customs offenses. ADUANAS is divided into six offices, four of which are related to import procedures and regulations: managing and tariff collection, sanction supervisory, smuggling prevention and boundary control, and the technical customs, which regulates tariffs. ADUANAS has offices on each port and airport nationwide that work in conjunction with private customs agencies. On July 12, 2002 ADUANAS merged with the Tax Agency (SUNAT), Ministry of Economy and Finances, by Supreme Decree No. 061-2002-PCM.

Ministry of Foreign Trade and Tourism - MINCETUR (Law No. 27790 of July 23, 2002)

Is the organism responsible for defining, leading, carrying out, coordinating, regulating and supervising the foreign trade and tourism. It also has the leading responsibility of negotiating trade agreements in coordination with other Ministries, principally the Ministry of Foreign Affairs and the Ministry of Economy and Finance.

National Institute for the Defense of Competition and for the Protection of the Intellectual Property - INDECOPI (Law Decree No. 25868 of November 24, 1992)

Within the Ministry's Presidential Council (PCM), it promotes loyal competence, protects all forms of intellectual property and encourages culture based on quality. Most important offices related to trade include:

Consumer Protection Office: protects consumer rights, especially the right of being properly informed on goods and services offered in the Peruvian market.

Dumping and Subsidies Office: regulates market distortions due to imports that enter Peru with subsidies or below market prices.

Technical and Trade Regulations Office: is the national standards agency. Prepares, approves and advertises the Peruvian Technical Standards, which are adopted voluntarily by the industry.

SECTION II. LABELING REQUIREMENTS

The Consumer Protection Office within INDECOPI is responsible for food and beverage labeling inspection and advertising (Supreme Decree No. 007-98-SA). Penalties depend on the importance of the offence committed, and could consist from warning letters to a \$90,000 fee.

General Requirements

Every food and beverage packed for marketing must be labeled in accordance with the provisions included in these regulations.

The label contents must comply with the provisions established in the Peruvian Metrological Standards NMP 001: 1995, Packed products. Labeling, and the Decree Supreme No. 007-98-SA. The information should include:

- ☐ Name of the product.
- ☐ Food additives and ingredients.
- ☐ Manufacturer's name and address.
- ☐ Importer's name, commercial name and address, phone, tax payer's identification (RUC). This information may appear on a separate adhesive label.
- ☐ Number of sanitary registration.
- ☐ Expiration Date (shelf life, established by the manufacturer) as provided in the Codex Alimentarius or the applicable Peruvian sanitary standard.
- ☐ Lot code or key.
- ☐ Special conservation conditions, if any.
- ☐ Net weight or volume of the content.
- ☐ Country of origin.
- ☐ Instructions for use.

New Law 28103, passed on November 21, 2003, will be in effect one year later. The law establishes the requirement that labels for imported value-added products are to be in Spanish for local trade. The label will need to include the previous labeling provisions but before customs clearance. This has to be done by the exporter or in a border warehouse, both of which will increase costs significantly. No regulations have been issued yet, but importers are concerned of this law will constitute a future trade barrier. Currently, an adhesive Spanish label needs only to be applied before the product reaches the point of sale.

SECTION III. PACKAGING AND CONTAINER REGULATIONS

Packaging (*Title VIII, Supreme Decree No. 007-98-SA*)

The package containing the product must be made of a harmless material, free from substances that could affect its food safety. Likewise, packages must be manufactured so as to preserve the product's sanitary quality and composition throughout its useful life.

Packing made of metals, alloys or plastic should not:

- ☐ Contain impurities consisting of lead, antimony, copper, zinc, chromium, iron, tin, mercury, cadmium, arsenic or other metals or metalloids that can be hazardous to human health in quantities or at levels above the maximum allowed limits.
- ☐ Contain residual styrene, vinyl chloride, achrynolityl monomers or any other residual monomers or substances that can be considered hazardous to human health in quantities or at levels above the maximum allowed limits.
- ☐ The maximum levels allowed will be determined by the Ministry of Health's sanitary standards.

This provision also applies to any lamination, varnish, film, coating or part of the package in contact with the foods and beverages. Packages manufactured from previously used recycled paper, cardboard or plastic are forbidden.

SECTION IV. FOOD ADDITIVE REGULATIONS

Food additives (*Title VII, Supreme Decree No. 007-98-SA*)

Sanitary quality of inputs and food additives: inputs and food additives for food and beverage manufacturing must meet the health quality requirements established in the sanitary standards issued by DIGESA. The Consumer Protection Office of INDECOPI is responsible for sanctions on the subject.

Allowed Additives: food additives not permitted by the Codex Alimentarius are forbidden and they cannot be kept within food and beverage facilities. Flavorings accepted by the United States Food and Drug Administration (FDA), and the Flavor and Extractive Manufacturing Association (FEMA) are allowed. For example, on October 10, 2002 potassium bromate, formerly very popular in Peru as bakery ingredient, was declared unfit for human consumption.

For a complete list of approved food and coloring additives the exporter should contact INDECOPI.

Sanitary Authorization for food additives (*Directorial Resolution No.0775/2003/DIGESA/SA of July 16, 2004*)

The importer should follow the procedure below to request the sanitary authorization or its renewal:

- ❑ Request form (available on-line) that include the name, address, Single Registry Number (RUC) of the importer, contact information of the manufacturer and the list of products for the sanitary authorization is being requested.
- ❑ For each additive the importer need to include the composition, type of package, storage conditions, useful life, lot code system and physical-chemical and microbiological quality analysis issued by the manufacturer laboratory or other authorized laboratory in Peru.
- ❑ Present the certificate of free trade and use issued by the health authority of the country of origin no older than one year. They should contain information on physical-chemical and microbiological characteristics of the product.
- ❑ Payment for administrative procedures and inspection. Facilities that have the sanitary permission updated require no inspection.

The sanitary authorization lasts six months from the date of issue. Issuing procedures take fifteen working days approximately.

SECTION V. PESTICIDE AND OTHER CONTAMINANTS

SENASA is the agency responsible for the regulation of pesticides, herbicides and fungicides used in fumigation of agricultural products. In general, Peru adopts international standards established in the Codex Alimentarius applying to all chemically treated products produced in country or imported which are intended for human and animal consumption. INDECOPI is the regulatory authority for the patent registration of pesticides and other agricultural chemicals.

SECTION VI. OTHER REGULATIONS AND REQUIREMENTS

DIGESA is responsible for sanitary regulations which apply to most processed food products, including their manufacture, in accordance with the Codex Alimentarius.

Food and Beverage Sanitary Registration (RSA)

The importer is responsible for sanitary registration of food and beverages or its renewal. The interested party will submit DIGESA a sworn application (available on-line) including the following information:

- ❑ Name or commercial name, address, and RUC of the importer.
- ❑ Manufacturer's name or commercial name, address and country of origin.
- ❑ Product or group of products for which the Sanitary Registration is being requested.
- ❑ Each product must include:
 - The physical-chemical and microbiological quality analysis issued by the manufacturer laboratory or other authorized laboratory in Peru. The microbiological quality analysis must accomplish with the provisions of the Ministerial Resolution No.615-2003-SA/DM.
 - The list of ingredients and quantitative composition of additives, identified by their generic name and international number reference.
 - Preservation and storage conditions.
 - Information about the packing used, including types and materials.
 - Useful life under normal preservation and storage conditions.
 - Lot code system.
 - Nutritional properties for special diet food and beverages.

Along with the sworn application, the exporter needs to submit the Certificate of free trade and use, as well as the registration receipt (\$64 approximately). DIGESA maintains an updated list of the authorities of foreign countries that issue those certificates. If those certificates are not available, the importer should present a document issued by the Peruvian Consulate in the country of origin. These documents must not be older than one year from their issuance date. The corresponding translation into Spanish must be enclosed.

The sanitary registration is issued per product or group of products, and per manufacturer. A group of products consist of those products elaborated by the same manufacturer and with the same qualitative composition of basic ingredients and food additives.

Code numbering of the Sanitary Registration will proceed as follows:

- ❑ RSA 000N (Food Sanitary Registration 000 Domestic) for domestic products.
- ❑ RSA 000E (Food Sanitary Registration 000 Abroad) for imported products.

Registration or renewal of registration of products in the Sanitary Registry will be accepted if the file complies with all the requirements established by law and these regulations. *This procedure will take no more than seven working days.* Verification of the product's sanitary quality will take place after the registration or renewal thereof in the Sanitary Registry, in compliance with the corresponding standards.

The Sanitary Registration of food and beverage will be valid for five years from the date of issue. It may be renewed after an application is filled by the registration holder between seven and sixty working days before the registration's expiration date.

Sanitary Authorization for Importing Samples of Food and Beverages (less than 100 Kg.)

In order to import food and beverage samples, the importer or the interested party should follow these steps:

- ❑ Submit to DIGESA's Director a sworn application detailing the product name, country of origin, weight and use.
- ❑ Copy of the commercial invoice.
- ❑ Copy of the airway bill or bill of lading or postal advice letter.
- ❑ Registration receipt (\$45 approximately).

Food and Beverage Sanitary Registry Classification

Food and beverages are classified within the Sanitary Registration as follows:

A. Milk and Dairy Products.	J. Meat and meat products.
B. Ice cream and Ice cream mixtures.	K. Hydro biological products (seafood).
C. Oil and fats.	L. Eggs and egg products.
D. Freeze-dried, dehydrated or concentrated products.	M. Salt, species, condiments and sauces.
E. Cereals, pulses and by-products.	N. Fruits and other vegetables (including tubers and mushrooms).
F. Sugars, honey and by-products.	O. Prepared food.
G. Confectionery.	P. Beverages.
H. Bakery and pastries.	Q. Stimulant and spirit beverages.
I. Special diet food.	R. Canned food.
	S. Food additives.

Import Certificate for Registered Food and Beverages

- ❑ Once registered, food and beverages can be imported and sold by anyone who does not hold the Sanitary Registration. If applicable, DIGESA will issue a sanitary registration certificate for imported product on behalf of the interested part.
- ❑ The importer and seller of a product under a sanitary registration certificate for imported product have the same responsibilities as the registration holder, concerning the sanitary quality and food safety of the product. In this case, the name or commercial name, the address and RUC of the importer must be printed or labeled on each package sold to consumers.
- ❑ The request for a sanitary registration certificate for imported products should include the purpose of the request, the product sanitary registration number, the name or commercial name, the address and RUC of the importer as well as the payment receipt (\$64 approximately).

SECTION VII. OTHER SPECIFIC STANDARDS**Endangered Species**

The Natural Resources Service (INRENA) is responsible for promoting the rational use and conservation of natural resources and endangered species. INRENA regulates the import and export of endangered species animals and plants under the Convention of the International Trade in Endangered Species of Wild Flora and Fauna (CITES).

Marine Products

The Vice-Ministry of Fisheries is responsible for sanitary supervision for fish capture, transportation and processing of hydro biological products, as well as to ensure sanitary conditions of shipment ports. The major laws and regulations assessed to fishery inspection programs for canned, frozen and cured fish are issued in the Resolution No. 409-98-PE of August 25, 1998.

DIGESA is responsible for issuing the sanitary registration certificate for imported seafood products.

SECTION VIII. COPYRIGHT AND/OR TRADEMARK LAW

INDECOPI ensures trademarks, copyrights and intellectual property through three offices: distinctive marks, new technologies and inventions (patents), and copyright.

Trademarks

The Office for Distinctive Marks is the organism in charge of the registration of trademarks, brands, commercial names, slogans and appellation d'origine and works accordingly to the Decision 486 of the Cartagena Agreement Commission about Industrial Property for Andean Countries and the Law Decree 823 for the Industrial Property. Also, Peru is a signatory to the Paris Convention for the Protection of Industrial Property into compliance with the WTO agreements on trade-related aspects of Intellectual Property Rights.

Register brands and trademarks to ensure brand property is highly recommended. The cost is approximately \$180 per brand.

SECTION IX. IMPORT PROCEDURES**Import Procedures in Peru's Customs (ADUANAS)**

For customs clearance the importer or local agent must present the following documentation:

- ☐ Customs Unique Declaration (DUA), issued in ADUANAS and filed by a customs agent.
- ☐ Airway bill or bill of lading.
- ☐ Commercial invoice.
- ☐ Packing list.
- ☐ Insurance letter.
- ☐ Food sanitary registry (RSA) for food processed products, issued by DIGESA, or sanitary certificate for animals, plants or their by-products, issued by SENASA.

Once the customs agent transmits the DUA electronically, ADUANAS will determine the type of control for the merchandise within the following channels: green, orange and red. Channel green permits deliver of the product once duties are paid; channel orange requires review of the documentation and channel red requires the review the documentation and physical inspection of the product.

Imported food products have an import tariff rate that varies according to the type of product, ranging between 12 percent and 25 percent. All imports are subject to 19 percent local sales tax. Beer and wine are assessed an additional selective consumer tax of 20 percent.

Customs Procedures for Importing Samples that do not exceed \$2,000 (FOB) in value

The owner of the merchandise, the consignee or the customs agent must follow these requirements to clear ADUANAS:

- ☐ Simple Declaration issued by ADUANAS and filled by the interested part.
- ☐ Airway bill, bill of lading or postal advice letter.
- ☐ Commercial invoice.
- ☐ Identification card or passport.
- ☐ RUC of the importer.
- ☐ Insurance letter.
- ☐ Sanitary authorization for food processed products or sanitary certificate for animals, plants or their by-products.

Once the Simple Declaration is processed, ADUANAS determines randomly the channel (green, orange or red) for the control of the product. Finally, the interested part needs to pay the corresponding import taxes and tariffs.

Fresh, Chilled and Frozen Products or By-products of Animal Origin

Before the product is shipped, the importer must request an import permit from SENASA. The exporter will provide to the importer the corresponding official animal health certificate of the country of origin. The import requirements provided by SENASA must be forwarded by the exporter including all the specific certification requirements of the statement.

Certificates for meats and by-products should be issued by the Food Safety Inspection Service (FSIS) within the United States Department of Agriculture (USDA). Sanitary certificates for U.S. Dairy products have to be issued by the Agricultural Marketing Service (AMS).

Imports of U.S. beef effectively stopped in April 2003, due to SENASA's regulations against a Canadian BSE incident. On December 26, 2003, SENASA banned imports of beef, goat, sheep and venison and their products from the United States due to BSE. Animal products declared by SENASA free of BSE risk include milk and dairy products, non-protein tallow and bicalcium phosphate, hides and skins, gelatin and collagen used exclusively for hides and skins, plasma or whey for in-vitro use.

On July 19, 2004, after a year ban, SENASA now allows U.S. poultry products imports. However, they need to come from companies registered in the U.S. National Poultry Improvement Plan and from states where AI (both high and low pathogenic) has not

occurred in last two years. The ban is kept for California, Connecticut, Rhode Island, Pennsylvania, Texas, Delaware, New Jersey and Maryland.

All certificates for animals or plants or by-products, must be error free, no pen or ink changes, or any other type of amendments. If applicable, and according to the product, it must be packed in a material authorized for human consumption, and labeled according to U.S. regulations. Also, the product must identify its content, net weight and the facility where it was produced, following SENASA's import requirements.

Fruits and Vegetables Commodities and Raw Agricultural Products

Agricultural products need to fulfill the same import procedures of animal origin products. The corresponding phytosanitary certificate has to be signed by the official inspector of the Animal and Plant Health Inspection Service (APHIS). SENASA's inspector at the port of entry verifies and confirms that it is free of quarantine pests or diseases, as specified in SENASA's phytosanitary requirements.

On January 4, 2003, SENASA issued phytosanitary requirements for seeds and vegetables of phytosanitary risk.

Processed Food Products

In order to import processed food products, including alcoholic and non-alcoholic beverages, documentation must be accompanied with the corresponding food sanitary registry (RSA) granted by DIGESA.

Appeals System for Disputed or Rejected Product

The infringement of Customs procedures and sanctions are issued in the Customs General Law Regulations (Supreme Decree No. 121-96-EF) of December 24, 1996. ADUANAS notifies in writing the type of infringement committed, giving 20 days to the importer to fulfill all requirements. If the importer disagrees with ADUANAS procedures or sanctions, he has the right to appeal to the following entities: the Customs National Office, the Prosecutor Court within the Ministry of Economy and Finance and the Ministry of Justice.
